INDEX OF AUTHORS

Volume VI

Transactions of American Society for Steel Treating

July, 1924—December, 1924

A

Archer, R. S. 615

B

Bain, E. C. 430
Brophy, G. R. 505

C

Campbell, E. D. 33

D

Davey, W. P. 375
deForest, A. V. 653
Diederichs, W. J. 491

F

Flanders, H. E. 623
French, H. J. 251

G

Grossmann, M. A. 430

H

Harper, J. F. 341
Hayes, Anson 491, 623
Heymans, P. 505
Homerberg, V. O. 295
Honda, Kotaro 187
Hoyt, S. L. 195, 396

J

Janitzky, E. J. 728

K

Kimball, Jr., A. L. 505
Kinsey, A. S. 515
Klopsch, O. Z. 251
Krivobok, V. N. 66

L

Lester, H. H. 575
Lucas, F. F. 669

M

MacPherran, R. S. 341
McAdam, Jr., D. J. 393
McKinney, P. E. 51

O

Owen, W. G. 125

P

Parmiter, O. K. 315
Pickwell, G. V. 145

R

Romig, O. E. 66

S

Scott, Howard 13
Shepherd, B. F. 606
Sorenson, James 77
Spalding, S. C. 499
Sykes, W. P. 138

T

Thackray, G. E. 443
Tour, Sam 171
Troendly, H. P. 145

W

Watson, J. M. 716
Whitney, G. W. 33

INDEX OF SUBJECTS AND AUTHORS OF PAPERS
Volume VI

TRANSACTIONS of American Society for Steel Treating

July, 1924—December, 1924

A

Abstracts of Technical Articles 95, 212, 425, 535, 635, 736

Alpha-Iron to Face-Centered Gamma-Iron; An Assumption as to the Cause of the Change of Body-Centered—*E. J. Janitzky* 728

Analysis to Metallurgy; Application of X-ray Crystal—*W. P. Davey*.... 375

Annealing Periods; Possibilities of Producing Malleable Iron and Intermediate Products of Value in Short—*Anson Hayes and W. J. Diederichs* 491

Annual Convention Details 217

Application of X-ray Crystal Analysis to Metallurgy—*W. P. Davey*.... 375

Assumption as to the Cause of the Change of Body-Centered Alpha-Iron to Face-Centered Gamma-Iron—*E. J. Janitzky* 728

Austenite and Martensite; Microstructure of—*F. F. Lucas*..... 669

Automobile Parts; Heat Treatment of—*J. M. Watson* 716

Automobile Truck Parts; System as Applied to the Control of Furnace Temperatures and Heat Treatment of—*James Sorenson*..... 77

B

Ball Indentation Hardness Test—*S. L. Hoyt* 396

Barium Carbonate upon Wood Charcoal Used for Cementation; Influence of—*B. F. Shepherd* 606

Bars (Small Steel) Differing only in Carbon Content and the Effect of Changes in Carbide Concentration on the Specific Resistance; Laboratory Method for the Preparation of—*E. D. Campbell and G. W. Whitney* 33

Baths; Salt—*Sam Tour* 171

Body-Centered Alpha-Iron to Face-Centered Gamma-Iron; An Assumption as to the Cause of the Change of—*E. J. Janitzky*..... 728

Brinell and Rockwell Hardness of Hardened High Speed Steel; Comparison of—*S. C. Spalding* 499

C

Carbide Concentration on the Specific Resistance; Laboratory Method for the Preparation of Small Steel Bars Differing only in Carbon Content and the Effect of Changes in—*E. D. Campbell and G. W. Whitney*.. 33

Carbon Content and Effect of Changes in Carbide Concentration on the Specific Resistance; Laboratory Method for Preparation of Small Steel Bars Differing only in—*E. D. Campbell and G. W. Whitney*.. 33

Carbon Steels in Relation to Some Quenching Media for Heat Treatment; Quenching Diagrams for—*H. J. French and O. Z. Klopsch*..... 251

Carburized Piston Pins; Some Notes on—*R. S. Archer* 615

Cause of the Change of Body-Centered Alpha-Iron to Face-Centered Gamma-Iron; An Assumption as to the—*E. J. Janitzky*..... 728

Causes of Failure of Metal Structures; Photoelastic Method for the Determination of—*P. Heymans, G. R. Brophy and A. L. Kimball, Jr*... 505

Cementation; Influence of Barium Carbonate upon Wood Charcoal Used for—*B. F. Shepherd* 606

Cementite in Hypoeutectoid Steel; Spheroidized—*R. S. MacPherran and J. F. Harper* 341

Changes in Carbide Concentration on the Specific Resistance; Laboratory Method for the Preparation of Small Steel Bars Differing only in Carbon Content and the Effect of—*E. D. Campbell and G. W. Whitney* 33

Chromium in High Speed Steel; Nature of the Function of—*E. C. Bain and M. A. Grossmann* 430

Clay Refractories; Progress in the Manufacture and Use of Clay Refractories—*W. G. Owen* 125

Comment and Discussion 91
525
630

Comparison of Brinell and Rockwell Hardness of Hardened High Speed Steel—*S. C. Spalding* 499

Concentration on the Specific Resistance; Laboratory Method for the Preparation of Small Steel Bars Differing only in Carbon Content and the Effect of Changes in Carbide—*E. D. Campbell and G. W. Whitney* 33

Constant Heat Potential; Temperature Distribution in Steel Bodies Heated at a—*E. J. Janitzky* 619

Control of Furnace Temperatures and Heat Treatment of Automobile Truck Parts; System as Applied to the—*James Sorenson*..... 77

Convention Details; Annual 217

Convention; Report of Sixth Annual 546

Crystal Analysis to Metallurgy; Application of X-ray—*W. P. Davey*.... 375

D

Determination of Causes of Failure of Metal Structures; Photoelastic Method for the—*P. Heymans, G. R. Brophy and A. L. Kimball, Jr.* 505

Determination of the Elastic State; Magnetic—*A. V. deForest*..... 653

Diagrams for Carbon Steels in Relation to Some Quenching Media for Heat Treatment; Quenching—*H. J. French and O. Z. Klopsch*..... 251
Distribution in Steel Bodies Heated at a Constant Heat Potential; Temperature—*E. J. Janitzky* 619

E

Education; On Metallurgical—*S. L. Hoyt* 195
Education; Symposium on Metallurgical 692
Effect of Changes in Carbide Concentration on the Specific Resistance; Laboratory Method for the Preparation of Small Steel Bars Differing only in Carbon Content and the—*E. D. Campbell and G. W. Whitney* 33
Elastic State; Magnetic Determination of the—*A. V. deForest*..... 653
Endurance of Metals; Strain (Abstract)—*D. J. McAdam, Jr.*..... 393
Eutectoid; Structural Evidence of an Iron-Carbon—*Anson Hayes and H. E. Flanders* 623
Examination of Steel; Macroscopic—*V. O. Homerberg*..... 295

F

Face-Centered Gamma-Iron; An Assumption as to the Cause of the Change of Body-Centered Alpha-Iron to—*E. J. Janitzky* 728
Failure of Metal Structures; Photoelastic Method for the Determination of Causes of—*P. Heymans, G. R. Brophy and A. L. Kimball, Jr.*... 505
Flame; Steel Under the Oxyacetylene—*A. S. Kinsey* 515
Foundry; X-ray Tests Applied to the Problems of the Steel—*H. H. Lester* 575
Function of Chromium in High Speed Steel; Nature of the—*E. C. Bain and M. A. Grossmann* 430
Furnace Temperatures and Heat Treatment of Automobile Truck Parts; System as Applied to the Control of—*James Sorenson*..... 77

G

Gamma-Iron; An Assumption as to the Cause of the Change of Body-Centered Alpha-Iron to Face-Centered—*E. J. Janitzky*..... 728
Glycerin and Its Water Solutions; Quenching Properties of—*Howard Scott* 13

H

Hardened High Speed Steel; Comparison of Brinell and Rockwell Hardness of—*S. C. Spalding* 499
Hardness of Hardened High Speed Steel; Comparison of Brinell and Rockwell—*S. C. Spalding* 499
Hardness Test; Ball Indentation—*S. L. Hoyt* 396
Heat Treater as Influenced by the Pre-Natal History of the Material; Problems of the—*P. E. McKinney* 51
Heat Treatment; Quenching Diagrams for Carbon Steels in Relation to Some Quenching Media for—*H. J. French and O. Z. Klopsch*.... 251
Heat Treatment of Automobile Parts—*J. M. Watson*..... 716
Heat Treatment of Automobile Truck Parts; System as Applied to the Control of Furnace Temperatures and—*James Sorenson*..... 77

High Speed Steel; Comparison of Brinell and Rockwell Hardness of Hardened—*S. C. Spalding* 499
High Speed Steel; Nature of the Function of Chromium in—*E. C. Bain and M. A. Grossmann* 430
History of Iron and Steel; Notes on the—*G. E. Thackray* 443
History of the Material; Problems of the Heat Treater as Influenced by the Pre-Natal—*P. E. McKinney* 51
Hypoeutectoid Steel; Spheroidized Cementite in—*R. S. MacPherran and J. F. Harper* 341

I

Indentation Hardness Test; Ball—*S. L. Hoyt* 396
Influence of Barium Carbonate upon Wood Charcoal Used for Cementation—*B. F. Shepherd* 606
Influenced by the Pre-Natal History of the Material; Problems of the Heat Treater as—*P. E. McKinney* 51
Inner Structure of Metals; Surface Structure versus—*V. N. Krivobok and O. E. Romig* 66
Iron; On the Transformations in Pure—*Kotaro Honda* 187
Iron; Stainless Steel and Stainless—*O. K. Parmiter* 315
Iron and Intermediate Products of Value in Short Annealing Periods; Possibilities of Producing Malleable—*Anson Hayes and W. J. Diederichs* 491
Iron and Steel; Notes on the History of—*G. E. Thackray* 443
Iron-Carbon Eutectoid; Structural Evidence of an—*Anson Hayes and H. E. Flanders* 623

L

Laboratory Method for the Preparation of Small Steel Bars Differing only in Carbon Content and the Effect of Changes in Carbide Concentration on the Specific Resistance—*E. D. Campbell and G. W. Whitney* 33
Liquid Air Temperatures; Tensile Properties of Some Steel Wires at—*W. P. Sykes* 138

M

Macroscopic Examination of Steel—*V. O. Homerberg* 295
Magnetic Determination of the Elastic State—*A. V. deForest* 653
Malleable Iron and Intermediate Products of Value in Short Annealing Periods; Possibilities of Producing—*Anson Hayes and W. J. Diederichs* 491
Manufacture and Use of Clay Refractories; Progress in the—*W. G. Owen* 125
Martensite; Microstructure of Austenite and—*F. F. Lucas* 669
Material; Problems of the Heat Treater as Influenced by the Pre-Natal History of—*P. E. McKinney* 51
Materials; A New Theory on Overstrain and Strength of—*H. P. Troendly and G. V. Pickwell* 145
Media for Heat Treatment; Quenching Diagrams for Carbon Steels in Relation to Some Quenching—*H. J. French and O. Z. Klopsch* .. 251
Metallurgical Education; On—*S. L. Hoyt* 195

Metallurgical Education Symposium, Boston Convention 692
Metallurgy; Application of X-ray Crystal Analysis to—*W. P. Davey*... 375
Metals; Surface Structure versus Inner Structure of—*V. N. Krivobok and O. E. Romig* 66
Metal Structures; Photoelastic Method for the Determination of Causes of Failure of—*P. Heymans, G. R. Brophy and A. L. Kimball, Jr*... 505
Method for the Determination of Causes of Failure of Metal Structures; Photoelastic—*P. Heymans, G. R. Brophy and A. L. Kimball, Jr*..... 505
Method for the Preparation of Small Steel Bars Differing only in Carbon Content and the Effect of Changes in Carbide Concentration on the Specific Resistance; Laboratory—*E. D. Campbell and G. W. Whitney* 33
Microstructure of Austenite and Martensite—*F. F. Lucas* 669

N

Nature of the Function of Chromium in High Speed Steel—*E. C. Bain and M. A. Grossmann* 430
New Theory on Overstrain and Strength of Materials—*H. P. Troendly and G. V. Pickwell* 145
Notes on Carburized Piston Pins—*R. S. Archer*..... 615
Notes on the History of Iron and Steel—*G. E. Thackray*..... 443
Notes from the U. S. Bureau of Mines 86
Notes from the U. S. Bureau of Standards..... 84
203
732

O

On Metallurgical Education—*S. L. Hoyt* 195
On the Transformations in Pure Iron—*Kotaro Honda* 187
Overstrain and Strength of Materials; A New Theory on—*H. P. Troendly and G. V. Pickwell* 145
Oxyacetylene Flame; Steel Under the—*A. S. Kinsey* 515

P

Parts; System as Applied to the Control of Furnace Temperatures and Heat Treatment of Automobile Truck—*James Sorenson*..... 77
Photoelastic Method for the Determination of Causes of Failure of Metal Structures—*P. Heymans, G. R. Brophy and A. L. Kimball, Jr*..... 505
Piston Pins; Some Notes on Carburized—*R. S. Archer*..... 615
Possibilities of Producing Malleable Iron and Intermediate Products of Value in Short Annealing Periods—*Anson Hayes and W. J. Diederichs* 491
Pre-Natal History of the Material; Problems of the Heat Treater as Influenced by—*P. E. McKinney* 51
Preparation of Small Steel Bars Differing only in Carbon Content and the Effect of Changes in Carbide Concentration on the Specific Resistance; Laboratory Method for the—*E. D. Campbell and G. W. Whitney* 33
Problems of the Heat Treater as Influenced by the Pre-Natal History of the Material—*P. E. McKinney* 51

Problems of the Steel Foundry; X-ray Tests Applied to the—*H. H. Lester* 575
Producing Malleable Iron and Intermediate Products of Value in Short Annealing Periods; Possibilities of—*Anson Hayes and W. J. Diederichs* 491
Products of Value in Short Annealing Periods; Possibilities of Producing Malleable Iron and Intermediate—*Anson Hayes and W. J. Diederichs* 491
Progress in the Manufacture and Use of Clay Refractories—*W. G. Owen* 125
Properties of Glycerin and Its Water Solutions; Quenching—*Howard Scott* 13
Properties of Some Steel Wires at Liquid Air Temperatures; Tensile—*W. P. Sykes* 138
Pure Iron; On the Transformations in—*Kotaro Honda* 187

Q

Quenching Media for Heat Treatment; Quenching Diagrams for Carbon Steels in Relation to Some—*H. J. French and O. Z. Klopsch* 251
Quenching Properties of Glycerin and Its Water Solutions—*Howard Scott* 13
Quenching Diagrams for Carbon Steels in Relation to Some Quenching Media for Heat Treatment—*H. J. French and O. Z. Klopsch* 251
Question Box 93

R

Refractories; Progress in the Manufacture and Use of Clay—*W. G. Owen* 125
Report of Sixth Annual Convention 546
Report of Sub-Committee on Tool Steel 649
Resistance; Laboratory Method for the Preparation of Small Steel Bars Differing only in Carbon Content and the Effect of Changes in Carbide Concentration on the Specific Resistance—*E. D. Campbell and G. W. Whitney* 33
Reviews of Recent Patents 98
209
423
530
637
Rockwell Hardness of Hardened High Speed Steel; Comparison of Brinell and—*S. C. Spalding* 499

S

Salt Baths—*Sam Tour* 171
Sixth Annual Convention; Report of 546
Solutions; Quenching Properties of Glycerin and Its Water Solutions—*Howard Scott* 13

Some Notes on Carburized Piston Pins—*R. S. Archer* 615
Specific Resistance; Laboratory Method for the Preparation of Small Steel Bars Differing only in Carbon Content and the Effect of Changes in Carbide Concentration on the—*E. D. Campbell and G. W. Whitney* 33
Spheroidized Cementite in Hypoeutectoid Steel—*R. S. MacPherran and J. F. Harper* 341
Stainless Iron; Stainless Steel and—*O. K. Parmiter* 315
Stainless Steel and Stainless Iron—*O. K. Parmiter* 315
Steel and Stainless Iron; Stainless—*O. K. Parmiter* 315
Steel Bars Differing only in Carbon Content and the Effect of Changes in Carbide Concentration on the Specific Resistance; Laboratory Method for the Preparation of Small—*E. D. Campbell and G. W. Whitney* 33
Steel Bodies Heated at a Constant Heat Potential; Temperature Distribution in—*E. J. Janitzky* 619
Steel Foundry; X-ray Tests Applied to the Problems of the—*H. H. Lester* 575
Steel; Comparison of Brinell and Rockwell Hardness of Hardened High Speed—*S. C. Spalding* 499
Steel; Macroscopic Examination of—*V. O. Homerberg* 295
Steel; Nature of the Function of Chromium in High Speed Steel—*E. C. Bain and M. A. Grossmann* 430
Steel; Notes on the History of Iron and—*G. E. Thackray* 443
Steel; Report of Sub-committee on Tool 649
Steel; Spheroidized Cementite in Hypoeutectoid—*R. S. MacPherran and J. F. Harper* 341
Steel Under the Oxyacetylene Flame—*A. S. Kinsey* 515
Steel Wires at Liquid Air Temperatures; Tensile Properties of Some—*W. P. Sykes* 138
Steels in Relation to Some Quenching Media for Heat Treatment; Quenching Diagrams for Carbon—*H. J. French and O. Z. Klopsch* 251
Strain Endurance of Metals (Abstract)—*D. J. McAdam, Jr.* 393
Strength of Materials; A New Theory on Overstrain and—*H. P. Troendly and G. V. Pickwell* 145
Structural Evidence of an Iron-Carbon Eutectoid—*Anson Hayes and H. E. Flanders* 623
Structure of Metals; Surface Structure versus Inner—*V. N. Krivobok and O. E. Romig* 66
Structures; Photoelastic Method for the Determination of Causes of Failure of Metal—*P. Heymans, G. R. Brophy and A. L. Kimball, Jr.* ... 505
Structure versus Inner Structure of Metals; Surface—*V. N. Krivobok and O. E. Romig* 66
Sub-committee on Tool Steel; Report of 649
Surface Structure versus Inner Structure of Metals—*V. N. Krivobok and O. E. Romig* 66

Symposium on Metallurgical Education, Sixth Annual Convention, Boston 692
System as Applied to the Control of Furnace Temperatures and Heat Treatment of Automobile Truck Parts—*James Sorenson* 77

T

Temperature Distribution in Steel Bodies Heated at a Constant Heat Potential—*E. J. Janitzky* 619
Temperatures and Heat Treatment of Automobile Truck Parts; System as Applied to the Control of Furnace—*James Sorenson* 77
Temperatures; Tensile Properties of Some Steel Wires at Liquid Air—*W. P. Sykes* 138
Tensile Properties of Some Steel Wires at Liquid Air Temperatures—*W. P. Sykes* 138
Test; Ball Indentation Hardness—*S. L. Hoyt* 396
Tests Applied to the Problems of the Steel Foundry—*H. H. Lester*.... 575
Theory on Overstrain and Strength of Materials; A New—*H. P. Troendly and G. V. Pickwell* 145
Tool Steel; Report of Sub-committee on 649
Transformations in Pure Iron; On the—*Kotaro Honda* 187
Treatment; Quenching Diagrams for Carbon Steels in Relation to Some Quenching Media for Heat—*H. J. French and O. Z. Klopsch* 251
Treatment of Automobile Parts; Heat—*J. M. Watson* 716
Treatment of Automobile Truck Parts; System as Applied to the Control of Furnace Temperatures and Heat—*James Sorenson* 77
Truck Parts; System as Applied to the Control of Furnace Temperatures and Heat Treatment of Automobile—*James Sorenson*..... 77

U

Use of Clay Refractories; Progress in the Manufacture and—*W. G. Owen* 125

W

Water Solutions; Quenching Properties of Glycerin and Its—*Howard Scott* 13
Wires at Liquid Air Temperatures; Tensile Properties of Some Steel—*W. P. Sykes* 138
Wood Charcoal Used for Cementation; Influence of Barium Carbonate upon—*B. F. Shepherd* 606

X

X-ray Crystal Analysis to Metallurgy; Application of—*W. P. Davey*.... 375
X-ray Tests Applied to the Problems of the Steel Foundry—*H. H. Lester* 575
